

List of Free GMI Windows Applications Published September, 2013

The following public domain and freely distributed GMI applications are available from the Vallum Software "App Exchange" site, and possibly other locations on the Internet. Visit the Vallum "App Exchange" site at the URL below to acquire the following (and other) GMI App packages:

<http://www.vallumsoftware.com/>

Each GMI application below has been certified for usage at any Windows 2000, 2003, XP, Vista, Windows 7, and Windows 2012 GMI Agent installation. Each application package contains a valid Description Document (DD), which provides a discussion of data items supported by the application, as well as notes on general usage.

GMI-App-Cpustat-1-1.zip

Cpustat.gmi "CPU Status" Application Package - This GMI application provides access to CPU performance counters, furnishing the ability to look at individual CPU performance in terms of total CPU, per-processor CPU, 1 minute and 5 minute load averages.

GMI-App-Diskmon-1-1.zip

Diskmon.gmi "Disk Monitor" Application Package - This GMI application provides access to Disk usage values, allowing the operator to view the disk size, disk used, disk free, and disk percent used for each mounted disk on the managed platform.

GMI-App-Filestore-1-1.zip

Filestore.gmi "File Store" Application Package - This GMI application provides general utility in furnishing a secure datastore for files uploaded to the agent. In addition to providing a shared area for selected files, the application logs access to these files for security and audit purposes.

GMI-App-Memstat-1-1.zip

Memstat.gmi "Memory Status" Application Package - This GMI application furnishes statistics on memory usage of the platform, including percent memory used, physical memory, virtual memory, page memory, and page rates, useful for performance monitoring and resource management.

GMI-App-Netstat-1-1.zip

Netstat.gmi "Network Status" Application Package - This GMI application furnishes statistics and network performance metrics in a fashion similar to the native "netstat" program of the platform. Statistics are provided for "ethernet", "ip", "icmp", "tcp", and "udp" network protocols.

GMI-App-Pinger-1-1.zip

Pinger.gmi "Pinger" Application Package - This GMI application provides general utility in continuously pinging a configured list of devices (at an operator configured interval) and logging the response time, and state of these devices. The application is especially useful for determining whether the network resources of a managed platform are available and troubleshooting network connectivity issues.

GMI-App-Pslist-1-1.zip

Pslist.gmi "Process List" Application Package - This GMI application permits an operator to list the currently executing processes of a platform, including the process name, ID, user-owner, and CPU usage for each process.

GMI-App-Rshell-1-1.zip

Rshell.gmi "Remote Shell" Application Package - This GMI application allows an operator to execute an arbitrary native program on the managed platform, and receive program standard (and error) output. This application should be used ONLY for sites where the GMI agent security features are enabled.

GMI-App-Svclist-1-1.zip

Svclist.gmi "Windows Service List" Application Package - This GMI application permits an operator to list the currently configured services of the platform, including the service brief name, full name, service state, and flags.

GMI-App-Svr-1-1.zip

Svr.gmi "Windows Server Monitor" Application Package – This GMI application provides useful statistics and metrics associated with managing Windows servers, including metrics on configuration, errors, files, objects, processes, sessions, and shares.

About The GMI Foundation

The GMI Software consists of agents, utilities, documentation and API's intended to promote secure and flexible management of end-points. GMI fully supports Open Source Initiatives, and views its role as one of not-for-profit promotion of software to correct the endemic problems associated with system and software management. More information on the GMI Foundation is available at the following location:

GMI Foundation
